PROJECTS

Jul 2025 – Aug 2025

Trip Buddy, Personal Project (Full Stack)

Tech: Node.js, Express.js, TypeScript, Prisma, PostgreSQL, Redis, React

Key Features:

- Designed domain-driven REST APIs for trips, itineraries, and timelines, with clean separation of concerns and consistent response structures.
- Implemented secure authentication using JWT with HTTP-only cookies, role-based access control, centralized validation, and error handling.
- Modeled relational data in PostgreSQL with Prisma, applying indexing and Redis caching to improve query performance and API responsiveness.

Code 🔗

Apr 2025 – May 2025

Pinterest Clone, Personal Project (Full Stack)

Tech: Node.js, Express.js, Prisma, PostgreSQL, TypeScript, React

Key Features:

- Built REST APIs for pins, boards, and user interactions, enforcing authorization rules for content creation, updates, and visibility.
- Designed normalized relational schemas with Prisma to handle likes, comments, and board–pin relationships while maintaining data integrity.
- Implemented backend workflows for image upload and content management, ensuring secure access and consistent data handling.
